

AutoFill™

Automated void filling and box closing

Ranpak's AutoFill™ is an innovative packaging solution that leverages machine vision to automatically measure void & dispense dunnage and an integrated random case sealer to close boxes. The system's ability to precisely dispense the right amount of void fill ensures the most consistent in-the-box packaging cost while delivering significantly higher productivity over manual operations.

Fully automated, the AutoFill™ system streamlines packaging operations, improving efficiency and productivity. With its advanced features, the AutoFill™ system is the ideal choice for businesses looking to optimize their packaging process.

Key Features

Fully Automatic Void Fill Insertion and Box Closing. Minimizes labor cost at end-of-line packaging: 1-3 FTEs can be saved and resources used for higher value-add activities.

100% Sustainable. Best-in-class sustainable packaging with the right amount of fully recyclable paper void fill material.

Versatile Solution. Handles a wide variety of random box sizes and allows for manual or automatic box erecting.

Precise and Consistent Void Fill Insertion. Accurate void measurement and adjustable dunnage insertion improves product protection by optimizing void fill paper usage.

High Throughput. Continuous operation filling and closing up to 8 boxes / minute.

Easy to Operate. Easy access for maintenance, user-friendly HMI with troubleshooting, paper cart for ease of paper loading.

Easy to Integrate. Into new and existing sites.

AutoFill™

Superior Packing Performance

State of the art HMI for easy operation and fast troubleshooting

Measures void volume for precise paper protection

Automatic box QA check with options for left or right reject direction

Combined filling and closing of minor flaps for maximum throughput

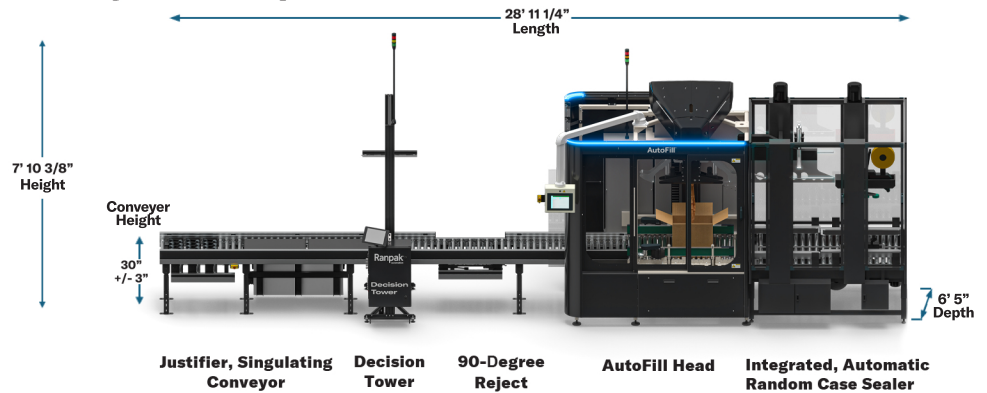

Fully automatic top taping with bottom tape option

Paper

Item 10000155	30# Fanfold
Bundle Width	30"
Bundle Length	1,660'
Bundle Weight	41.5 lbs.

AutoFill™ System Components

AutoFill™ System Information

Infeed Conveyor*

- Conveyor speed - 80-100 FPM
 - Conveyor width - 22" standard
- *Infeed conveyor not included.

Box Size Range

- Minimum: 8" L x 6" W x 4" H
- Maximum: 30" L x 20" W x 20" H

Random Automatic Case Sealer

- Multi-size case taping

Controls

- HMI screen

Power and Air Requirements

- 480V @ 20 Amps
- 100 PSI, min 2.5 SCFM

Standard Options

- Right or left handed reject direction
- Paper cart same side as reject conveyor (optional paper cart configurations)
